

Test document — page 1 of 5

This page exists to give the PDF tools something realistic to work on.

It holds nothing but text: a heading, a few paragraphs and a page number.

Because there is no image here, the page costs very little in the file.

That is the whole point of the test document — the pages deliberately differ in weight, so a size measurement can show that file size follows the content you keep, not the number of pages you keep.

Test document — page 2 of 5

This page exists to give the PDF tools something realistic to work on.

It holds nothing but text: a heading, a few paragraphs and a page number.

Because there is no image here, the page costs very little in the file.

That is the whole point of the test document — the pages deliberately differ in weight, so a size measurement can show that file size follows the content you keep, not the number of pages you keep.

Test document — page 4 of 5

This page exists to give the PDF tools something realistic to work on.

It holds nothing but text: a heading, a few paragraphs and a page number.

Because there is no image here, the page costs very little in the file.

That is the whole point of the test document — the pages deliberately differ in weight, so a size measurement can show that file size follows the content you keep, not the number of pages you keep.

Test document — page 5 of 5

This page exists to give the PDF tools something realistic to work on.

It holds nothing but text: a heading, a few paragraphs and a page number.

Because there is no image here, the page costs very little in the file.

That is the whole point of the test document — the pages deliberately differ in weight, so a size measurement can show that file size follows the content you keep, not the number of pages you keep.
